NEVEON

The Future of Foam

A CULTURE OF HEALTHY SLEEP: FORMS THE BEDROCK OF DAILY PERFORMANCE

Using a combination of original ideas and a wealth of experience, together with our customers we develop the ideal inner design for foam-based bedding items. Irrespective of whether mattresses, toppers, pillows

or quilts are involved, we supply the bases and in this connection can turn to our diverse foam range and the latest processing technology. In teamwork, we then develop unique products for a good night's sleep!

TOP QUALITY FOAMS FOR MAXIMUM COMFORT

Our foam portfolio consists of a variety of top quality and premium class foams with special characteristics. This results in innumerable possibilities for the design and combination of mattresses and toppers. It also allows an individual response to customer requests and the various sleep needs of

consumers. Design and comfort claims are constantly met subject to ergonomic considerations and the standard of performance is secured with internationally recognized certificates. We look forward to your innovative ideas for the design of sleeping materials. With NEVEON you have a strong partner at hand.

murea BRAND FOAMS PROMISE UNIQUE COMFORT CHARACTERISTICS

As a leading foam manufacturer, we have a focus on the future demands of the market and develop foams with supplementary functions, which above all strengthen the position of our customers in the premium segment.

- foam .classic foam .sensitive
- foam .comfort foam .memory
- foam .hybrid foam .protect

ADVANCED TECHNOLOGIES FOR INDIVIDUAL DESIGNS AND ERGONOMIC CUTS

We regard the production and further processing of foam as being our key competence. Accordingly, we have a pool of modern technologies at our disposal for the perfectly coordinated combination of differing materials and types of foam. In line with customer requirements, we are able to cover the entire value added chain from basic materials to products with a complex design. For the bonding of differing mate-

rials, we either employ low- or solvent-free adhesives. Moreover, using our in-house developed surface modification technology (SMT) we can offer individual possibilities for unique surface designs. We are also pleased to receive customer ideas for the design of mattress cores, pillows and toppers, which are then realized from 3D visualization and prototyping to the finished product solution on a one-stop-shop basis.

COMFORT FOAMS

Our **murea** range consists of anatomically highly elastic foams with exceptional comfort characteristics. The leading light are permanently suitable materials which are soft and smooth on the upper surface and elastic and supportive on the inside.

FOAM.HYBRID

By combining them with special additives, we raise our high-quality foams to a new level and combine the properties of different foam families. Our latex infused foam gets its special character through the combination with latex.

FOAM.SENSITIVE

We offer a variety of foams especially for bedding that contains exceptional additives for maximum hygiene. Above all, these foams are ideal for allergy sufferers, as dust mites are robbed of their habitat. Convince your customers with a maximum of hygiene.

OUR FOCUS ON SUSTAINABILITY

We replace already up to 20% of the raw materials used in foam.comfort und foam.classic with replenishable substances. The addition of cellulose fibers improves the moisture management of the foam and is thus ideal for sleeping areas.

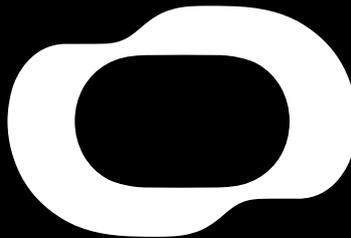

WE ARE NEVEON

We develop products that enhance the lives of people around the world. As a specialist for innovative and sustainable foam solutions we pursue fresh approaches and are passionate about future-oriented ideas.

We offer exceptional flexible and composite foams for the vast diversity of applications provided by our Living & Care, Mobility and Specialties business units.
